AI Engineer

SUMMARY

AI Engineer with 3+ years of experience in AI application development and LLM powered workflows. Delivered 25 REST API endpoints in one month and resolved 20 backend issues, enhancing stability. Created Python and SQL pipelines that cut reporting effort by 10 hours weekly and eliminated 15 manual hours per week. Strong focus on designing scalable retrieval augmented and semantic search solutions using LangChain and PostgreSQL.

SKILLS

AI & LLMs: LLMs, RAG, Prompt Engineering, LangChain, OpenAI APIs, Embeddings, Vector Search, Retrieval Systems, LLM Powered Workflows, Semantic Search

Programming & Backend: Python, Node.js, Express.js, FastAPI, JavaScript, TypeScript

Frontend & UI: React

Data & Databases: PostgreSQL, Supabase, MongoDB, SQL, Data Pipelines, Data Validation, ETL Pipelines

APIs & Integrations: REST APIs, API Integrations, JSON

Cloud & Deployment: AWS, Docker, Render, Netlify

Development Tools & Practices: Postman, GitHub, Debugging, Logging, Technical Documentation, Agile

WORK EXPERIENCE

Hirello.AI

AI Engineering Intern

Apr 2026 - Present

- Built and tested 25 REST API endpoints within one month, covering authentication, applications, contracts, approvals, and user workflows.
- Connected backend services, database updates, and API flows across ten Supabase/PostgreSQL tables to enable end to end data synchronization.
- Tested over 35 API requests using Postman, JSON payloads, authentication tokens, route parameters, and database validations.
- Resolved more than 20 backend issues related to API routes, authentication flows, environment setup, request handling, and database operations.
- Collaborated with product and engineering teams to translate requirements into backend services, API integrations, and production ready workflows.
- Documented API behavior, test outcomes, and product decisions, providing clear guidance for debugging, handoff, and frontend integration.

SAK Informatics

Software Engineer

Feb 2022 - Nov 2023

- Built five Python and SQL workflows adopted by three users and one team, cutting reporting effort from fifteen to five hours weekly.
- Developed REST API integrations and backend services that processed, validated, and reported data for internal systems.
- Created SQL validation checks that improved consistency across structured business datasets and reduced data anomalies.
- Turned repetitive reporting and validation tasks into reusable Python and SQL workflows, empowering business users with self service capabilities.

Cisco

Software Engineer

Jan 2021 - Jan 2022

- Developed Python automation for monitoring, validation, reporting, and workflow support, decreasing manual effort by fifteen hours each week.
- Improved SQL based reporting and validation workflows, enhancing operational data checks and increasing overall data reliability.

PROJECTS

AI Powered Job Tracker with Smart Matching | [zippy quokka 0cd1c3.netlify.app/](https://zippyquokka0cd1c3.netlify.app/)

- Built RAG based retrieval workflows using embeddings, semantic search, OpenAI APIs, LangChain, and PostgreSQL backed data to support AI driven search and recommendations.
- Designed the full product flow from resume parsing and job retrieval to AI driven recommendations and search results.
- Integrated 6 technologies into one deployed product and completed 7 deployment iterations to improve ranking behavior and application stability.
- Tested 12+ resume versions to compare ranking behavior, filter accuracy, and AI generated match results.

EDUCATION

Southeast Missouri State University

Master of Science in Computer Science

Cape Girardeau, Missouri

Jan 2024 - Dec 2025

Jawaharlal Nehru Technological University

Bachelor of Technology in Computer Science

Hyderabad, India

Aug 2018 - May 2022
